## PROJECTS

### • [Ascended battle](#)

JAVASCRIPT, REACT, REDUX, NODE, MONGODB, HTML, CSS

- Interactive strategy card game, player vs player mode included with real time updates using the power of sockets
- Developed in a way that is scalable, using the redux framework and also easy to maintain, creating space for future improvements
- Developing this project I took on the challenge of creating a bug free game, which taught me the skills needed to solve complex problems and to manage the functions focusing on performance and keeping them pure

### • [Anime search](#)

JAVASCRIPT, REACT, REST API, HTML, CSS

- Used a RESTful API to serve data to the client in the most efficient way
- Utilized a variety of research methods to assess the accuracy and quality of reading documentation
- Developed and implemented strategies to improve reading documentation
