PROJECTS

• Interactive card game

JAVASCRIPT, REACT, REACT-ROUTER, FIREBASE, HTML, CSS

- Player versus computer interactive game
- Developed in a way that is scalable and also easy to maintain, creating space for future improvements
- Developing this project I took on the challenge of creating a bug free game, which taught me the skills needed to solve complex problems and to manage the functions focusing on performance and keeping them pure

• Anime search

JAVASCRIPT, REACT, HTML, CSS

- Used a RESTful API to serve data to the client in the most efficient way
- Utilized a variety of research methods to assess the accuracy and quality of reading documentation
- Developed and implemented strategies to improve reading documentation
